ETCETERA

Good morning!

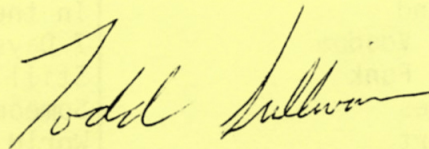

1986-Can you beleive it?! It's funny how one number can be a turning point in your life. Maybe it's those good ol' New Year's Resolutions. An important one that I'm going to try is, Getting more playlists out to all you fine folks.

For those who were wondering, Howard's still here only his time here has been cut down to an extreme low. He's now off producing "big league radio specials." My hours these days are MWF from 9:30-10:30 and TTH 2:30-7:30. You might be able to reach me at other times but who can say what the future holds. The best thing to do is to leave a message (818)885-3709.

My new picks on this playlist are: Faith No More-The title track is already in my top all-timers; The Sound-This double live Lp would probably be making alot of waves if it was a single studio Lp; Get Smart- Their new live 45 is 100% better than their already fine Lp Action Reaction; and The Woodentops-Ever changing, ever good.

If any bands from out of town that are thinking of visting L.A., give me a call and we'll see if we can work out a gig.

Anyways, keep listening to good music (turn off that Top 40 rubbish).
